

History of photography (part 4): photography as a tool

CS 178, Spring 2009

Marc Levoy
Computer Science Department
Stanford University

Outline

- ◆ the technology improves
- ◆ popularization of photography
- ◆ documenting the growth of America
- ◆ gigantic undertakings (around the world)
- ◆ the industrial aesthetic
- ◆ scientific uses of photography
- ◆ documenting the social scene
- ◆ the Great Depression and the Dust Bowl
- ◆ profile: photographers of the Farm Security Administration
- ◆ still to come: photojournalism, modern art photography...

The technology improves

- ◆ 1878 dry-plate photography (Richard Maddox, Charles Bennett)
 - gelatin-silver bromide
 - exposure time under one second
 - plates could be stored, separating shooting from processing
- ◆ 1885 paper roll film (Arthur Melhuish, George Eastman)
 - multiple pictures without fiddling
- ◆ 1880s shutters (many people)
 - needed as films became more sensitive
 - focal plane (roller blind), leaf (diaphragm)

(wikipedia)

The Kodak Camera

(Newhall)

(brightbytes.com)

George Eastman
(1854-1932)

- ◆ 1888 Kodak camera No. 1
 - fixed-focus, single shutter speed (1/100 sec?)
 - 100 shots per roll, then mail the camera back for reloading
 - “You press the button, we do the rest”
 - \$25 for the camera, \$10 per roll to process
 - contribution was not a single invention, but a system

Edison's lighting system

Thomas Edison
(1847-1931)

- ◆ 1880 patent for incandescent light bulb
- ◆ 1882 first lighting system, New York City
- ◆ system components
 - central generating station
 - underground conductors
 - usage meter
 - wiring and plugs
 - sockets and fixtures
 - fuses to prevent overloading
- ◆ misjudged one component
 - direct current versus alternating current

Related technologies

(Tim Page)

(wikipedia)

first photograph
printed using
halftoning

- ◆ 1870s German chemistry / dye / drug industries, worldwide industrialization and standardization
- ◆ 1880 flash photography (using flash powder)
- ◆ 1890 platinum paper printing (deeper blacks, expensive)
- ◆ 1873 screen-based halftone printing for mass publication

Later technologies

- ◆ 1850s telephoto lenses (Petzval)
- ◆ 1890s anastigmatic lenses (Zeiss)
- ◆ 1925 35mm camera (Leica I)
- ◆ 1932 photoelectric meter
- ◆ 1920s zoom lenses for cinema
- ◆ 1960s zoom lenses for still cameras
- ◆ 1981 autofocus SLR (Pentax ME-F)

Popularization of photography

- ◆ before George Eastman, photographers were skilled, photographs were posed, and images were “crafted”
- ◆ the Kodak camera was cheap, portable, and easy to use
- ◆ photography became casual, spontaneous, and popular
- ◆ concentrated on documenting everyday life
- ◆ word “snapshot” invented by Herschel
- ◆ privacy became an issue (it still is)
- ◆ women started taking pictures - so subjects changed

Scientific uses of photography

- ◆ aerial photography
- ◆ freezing motion
- ◆ the birth of cinematography
- ◆ the effect on modern art

Aerial photography

- ◆ from balloons
- ◆ from tall buildings
- ◆ from airplanes
- ◆ from space

Eadweard Muybridge
(1830-1904)

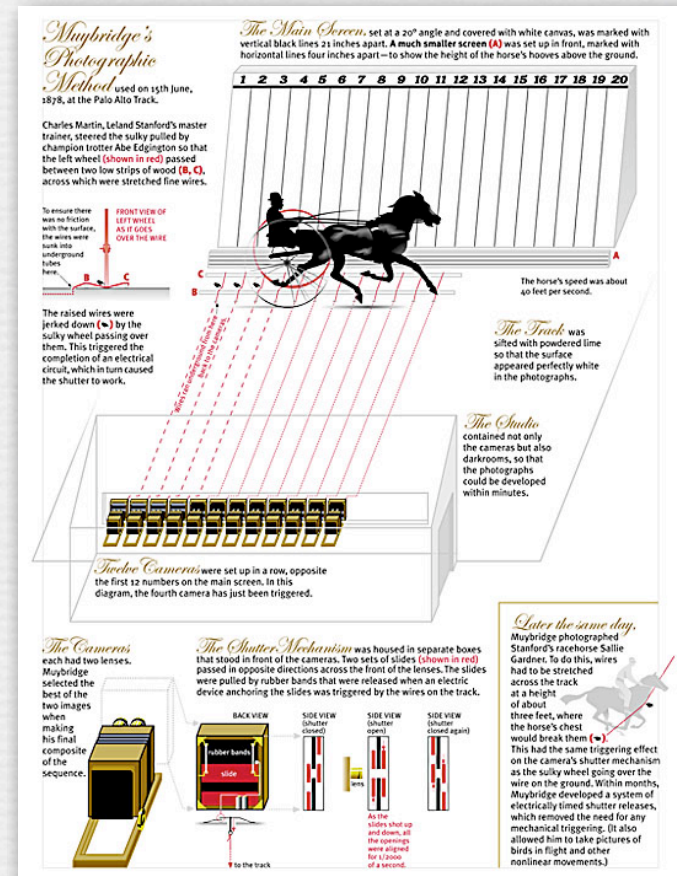

Muybridge and Stanford

Leland Stanford
(1824-1893)

- ◆ In a galloping horse, are all four hooves in the air at once?
- ◆ collaborative effort; Stanford suggested using trigger wires
- ◆ experiments spanned 1872-1878, in Palo Alto & Sacramento, with an interruption in 1874 when Muybridge was tried for the murder of his wife's lover

(Stanford magazine)

MUYBRIDGE.

AUTOMATIC ELECTRO-PHOTOGRAPH.

"SALLIE GARDNER," owned by LELAND STANFORD; running at a 1.40 gait over the Palo Alto track, 19th June, 1878.

The negatives of these photographs were made at intervals of twenty-seven inches of distance, and about the twenty-fifth part of a second of time; they illustrate consecutive positions assumed in each twenty-seven inches of progress during a single stride of the mare. The vertical lines were twenty-seven inches apart; the horizontal lines represent elevations of four inches each. The exposure of each negative was less than the two-thousandth part of a second.

The birth of cinematography

- ◆ Muybridge's images could be viewed using a Zoopraxiscope (invented by him)

The birth of cinematography

- ◆ Muybridge's images could be viewed using a Zoopraxiscope (invented by him)
- ◆ first practical unlimited-duration recording technology was Edison's 1893 Kinetograph (with William Dickson)
 - perforated 35mm-wide strip of celluloid film
 - intermittent pull-down at 30 frames per second
- ◆ looped, backlit filmstrip displayed to individual viewers using Edison's Kinetoscope

Staircase No. 2, 1912

Documentating the social scene

- ◆ photography recognized early as a force for social change
- ◆ social conscience initially awakened by seeing inequity in Europe's colonial possessions, e.g. Egypt, Cuba, North Africa
- ◆ government-funded projects undertaken to document ethnic groups and their living conditions, for lectures or pamphlets
- ◆ expanded to include the economic hardship in Europe and American brought about by industrialization
- ◆ given impetus by late 19th-century moral reform movements, many of them religious in origin
- ◆ before paper film, photographs were carefully posed, so they seldom represented real living or working conditions
- ◆ ability to influence public opinion needed the power of the printing press, not individual prints hanging in an art gallery

The Progressive era

- ◆ transition from religious charity to social agitation
- ◆ gradual realization that urban poverty arose from economic laws, not the moral inadequacy of slumdweller
- ◆ seminal work was Jacob Riis's 1890 book "How the Other Half Lives", about the tenements of New York

The Great Depression

- ◆ causes included uncontrolled an stock market, unstable banking system, inequitable distribution of income, and agricultural collapse caused by excessive production and misuse of marginal farmland
- ◆ milestone was the October 1929 stock market crash, but the market didn't bottom out until 1933
- ◆ marked by bank failures, high unemployment, labor unrest, and agricultural hardship, exacerbated by draught in the early 1930s

Soup kitchens and breadlines

Farm Security Administration

- ◆ created by Franklin Roosevelt in 1935 as the Resettlement Administration, to combat rural poverty
- ◆ under Roy Stryker, photographers were hired to record the agricultural disaster unfolding on the High Plains, to help justify multiple, expensive relief programs
 - Walker Evans
 - Arthur Rothstein
 - Dorothea Lange, and 8 others
- ◆ related effort
 - Margaret Bourke-White
